THE INTELLIGENCER WHEELING, MAY 6, 1809.

The Southern Race Question. In connection with the discussion that is now going on concerning the race problem in the south, growing out of recent occurrences in Georgia, some comments in southern papers regarding the work of Booker Washington are suggestive enough to be worthy of consid eration. Conservative southern papers and a few not so conservative, that ar commenting on the question, are of the oninion that a few more Booker Washingtons would go far toward eliminating the prejudice which now exists, and would at least better the conditions.

The southern states are doing a grea deal in the way of supporting the colored public schools, and the results have been most satisfactory in several of the states. But the plan of Booker Washington covers a much broader field than the mere instruction of the colored people of that section in the rudiments of common school learning. He is applying a great principle in connection with this education, which renders the learning of more advantage to his people in the south than comes with the mere knowledge.

The work which Booker Washington, who, by the way, is a product of West Virginia, is doing, does not by any means find its sole support in the north. but the southern press and southern people recognize in it the forerunner of better days in the future for the colored race. It will take some years to make the plan general enough, but the effects of what has already been done by this one man is felt and recognized and those who are on the ground thoroughly appreciate it.

Birmingham, Alabama, News, furnishes a fair sample of the comment which is becoming frequent in the southern press, as a result of the impression made by Booker Washington's institution, which has attracted so much attention throughout the country on account of its successful efforts. In characteristic language, the News remarks that "Washington's object is to teach the negro to do something, and continues:

and continues:

He does not believe in the "prominent colored citizen" who has no trade. He has a contempt for the "smart nigger" who lives by his wits. In other words, Washington is teaching his people to become respectable and self-respecting members of society, and the only way to do that, as he rightly puts it is to know how to earn a good livelihood. Tals wonderful man deserves the sympathy and encouragement of every white person in the south. He is a genius who has accomplished as much in his way as Edison has in the field of electricity. He is a man of cournon sense and earnest honesty, and his fidelity to the high mission in which he is achieving so much success is worthy of the admiration of the world.

Washington's influence is spreading most needed, because of the peculiar conditions. He has solved the importplan of work instituted by this man in every state where the advancement, by reason of ignorance on the one side and prejudice on the other, has been glow will prove a power in the direction indicated by the Birmingham paper. There are other Booker Washingtons many of them. They only need to come to the front. It is eminently proper that the leaders in this movement should be men of the colored race, and the News undoubtedly reflects the truth when it says that the work would be encouraged by every intelligent white person in the south

Incidentally it may be noted, with pleasure, that the state of West Virginia supports a similar institution to that established by Booker Washington in the West Virginia Colored Institute at Farm. It instructs the colored pupils in the agricultural and mechanical arts. Prof. Jones, formerly of Wheeling, is the principal.

A Costly but Wholesome Lesson.

The young man from out the Baltimore & Ohio road who was foolish enough to be taken in by the "green goods" swindle perpetrated on him by two strangers in this city Thursday, does not deserve a great amount of sympathy, though the swindlers do deserve a term in the penitentiary. The young man should have known, if he money knowingly is as much of a crime as to manufacture it. Had he been an attentive newspaper reader he would have known that he was being made a victim of an old trick. When he came with laurels, and the country will Join to Wheeling and handed over to stran-gers, whom he had never laid eyes upon prompt recognition of his former exbefore, the sum of \$350 of his hard earned good money, each dollar being worth one hundred cents under our gold gtan- efforts. dard, with the expectation that he was to receive in return \$3,600 in "money" that was guaranteed to deceive Uncle Sam's smoothest experts, he should have known, in this enlightened age, that he was coming here to be a party to a

swindle, in the capacity of the victim. It is an amazing fact that so many inspector consented that the ceremony apparently honest people are so easily could come off providing that it be held

with the disappearance of the green goods men, and he was not even compenated with the bogus funds promised. before, who have been persuaded that

'guaranteed to deceive anybody.' These victims do not come from the criminal classes, we regret to say, but are often well-meaning, innocent individuals who do not read the newspaper warnings against such swindlers, and whose consciences are sorely and successfully tempted by the smooth tongued coundrel, who visits him in his home and persuades him it is not wrong to circulate money that is "just as perfect

The Great Steel Combine.

lars. It is to include several very large corporations, with capital ranging from twenty to a hundred millions each, the Carnegie Company representing the latter figure. Mr. Carnegie, it is alleged, will retire from business and Mr. Frick is to conduct matters. .

The anouncement is giving rise to a great amount of discussion concerning this climax of the combination movenent. This one, which is to have for its back-bone the Carnegie Steel Company, is to combine also the National Steel Company, the American Tin Plate ompany, the American Steel Hoop ompany, the American Steel and Wire Company, the National Tin Plate and Enamel Company, and a number of others. Each of the corporations is mething of a combine in itself, and the whole is to be a combination of ombines. It is wide in its scope and will be powerful in its influence on the steel market, for it will be in practical control.

There have been denials from partie interested in the combination that the plans were formulated, but the latest statements are made on apparently good authority. One of the authorities for much of the information concerning the proposed combination, President Gates, of the American Steel and Wire Company, says the capital may reach a billion dollars, that it will take in about all the companies worth having, which, as a single distributer, will be a good thing and make business better. It is sincerely hoped that Mr. Gates is orrect in his calculations.

The near future will develop whether the big combinations that are being formed will prove a positive benealt to the country or not. In most cases one of the causes, and it may be said the principal cause, for the formation of a number of them, is held to be the depression of prices resulting from the depends upon the wisdom with which the control of prices is exercised as to whether the combines are wise in themselves or not. That is all in the fu There is no doubt that a large num

ber of the new trusts that are trusts pure and simple have been created to make new securities to be sold on the market for a profit, for great quantities of the stock are watered. The new stee organization, however, if the state ments of those who are at the head of the deals are to be taken, is to be classed among the more substantial of the combines, with their capitalization and stocks based upon actual values, and formed merely because competition has become so great that the competitors | Hague this month will be a failure, and find it necessary to place a limit on it by combining. This explains the expression of President Gates, to the effect that where there is but one dis- in person. He says that as long as govtributer trade will be improved and prices sustained.

If the steel combine is to be conduct ed on legitimate lines in this respect, it may accomplish that benefit. It cer-tainly has the facilities for it. It is hoped that, while all these events in the business world are taking place, the the possibilities of trusts formed for the sole purpose of manufacturing securities based on watered stock and not be forgotten. They are deaggrous al defense. and work great evil. The whole subject ant problem. The establishment of of trusts is one for serious considera-

The Philippine Situation.

The news from Manila this morning s good news. The steady advance of Americans in the campaign in northern Luzon carries victory with it at every point. General MacArthur's division captured San Fernando, which was one of Aguinaldo's strongholds without loss, the rebels having evacuated the place, and as usual set fire to

Further particulars from the advance of General Lawton's division indicate that it has been attended with considerably more fighting than was at first reported. An incident which signifies how unworthy the Filipinos are of the sympathy they are receiving from certain quarters in this country, is found in the statement that when Lawton was attacking the trenches outside of Ballings, he noticed that the Tagals had Ballings, he noticed that the Tagais had women and children in the trenches to prevent the Americans from firing on themselves. He sent Captain Case with a party under a white flag to warn the a party under a white flag to warn the wards to take the women and children from the position, and the party yns fired upon. All things considered the campaign is being pushed rapidly and successfully.

General (late Colonel) Funston has again distinguished himself by taking San Tomas with his command, and after a desperate resistance on the part of ploits by a promotion seems to have inspired the little commander to greater

Even small pox in a family living in one of Pittsburgh's suburban towns did not prevent a marriage ceremony coming off on scheduled time. The father of the bride had the disease and the whole family was quarantined. The health

led into such trouble as this young man under a tree outside the house, and no has suffered. His \$359 in each went one present but the family and the with the disappearance of the green minister. The instructions being carried out, the wedding party re-entered the house and the bride and groom will He has paid dearly for his folly, just as spend their honey-moon in quarkatine, not being permitted to leave the house until the small-pox disappears. they could get rich by buying money are no terrors for those two hearts even under the yellow flag.

COL. HENRY WATTERSON Expresses Himself Vigorously on a

Much-Discussed Question.
Louisville Courier Journal, (Dem.): The action of the postmaster general in topping the transmission to the Philppines of Edward Atkinson's pamphlet esigned to excite mutiny among our soldiers at the front was not taken a day too soon.

There has been too much of that sort of thing, and if this should not stop it steps should be taken to enforce the law against it. Our troops in the Philippines are not the tribunal which is to determine our Philippine policy. They are there to obey orders, and no one can be allowed to incite them to discontent or worse by appenling to them as an advocate of any particular policy.

Mr. Atkinson's argument in defense of his course is no argument at all, except against himself. The pamphlets, he saye, were addressed, one to the President and the other to the senate,

The count does not, however, think

and were addressed against the policy of "criminal aggression." But addressing the President and the senate against the Philippine policy is one thing, while it is guite another thing to so address the soldiers whose sole duty is to carry out the policy which they are ordered by the President and Congress to carry out. The fact urged by Mr. Atkinson, that his pamphlets are largely rehashes of matter that has appeared in the Congressional Record, is not in the least pertinent. Congress is the place where arguments for or against any proposed Philippine policy should be made; not the army actively engaged in executing the orders of the government. Mr. Atkinson may present his arguments, his appeals, his demands, his invectives to Congress if he chooses; but when he attended to the constant of the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the chooses; but when he attended to the constant of the constant of

appeals, his demands, his invectives to Congress if he chooses; but when he attempts to get them before our soldiers and to influence them from the performance of their duty, he violates not only the law, but the simplest principles on which our government rests.

Mr. Atkinson is an intelligent man. He has a right to his onlinion as to what shall be done with the Pollippines. He has a right to speak for those opinions. But he has no right to make his

ong the anti-expansio ists know that they will not be permit-ted to transgress that law further.

Chicago Journal: A little nine-yearold girl lay on the lounge in a sunny

window, swathed in blankets window, swathed in blankets.

She was enjoying a brief respite from
the twinges of inflammatory rheumatism, and her eyes were following the
figures of her scientific papa, who was
striding up and down the floor of the
study adjoining. He had been writing
a lecture to deliver before the Woman's
club and was rehearsing it. He talked
eloquently and threw out his arms.
"Environment means much in the scale
of human happiness," he was saying,
"but heredity is always creening in to "but heredity is always creeping in baffle the most glorious environme

Heredity—"
A piping voice stopped him.
"Papa," called the nine-year-old; "did rour mother have inflammatory rheu-

our mother have inhammatory factories at ism?"
"I suppose, dear," said her father.
"Did my Grandma Green?"
"I shouldn't wonder."
"Bid my grandpas."
"If guess so," said the absent-minded man, and then came to his senses at hearing the child say;
"Papa, I must never get married. This is a pretty bad thing, and it may as well stop here as any place."

A Tragedy.

She passed ine in the crowded square,
And on her little face forforn
I caucht a glimme despair.
Her childish brow had sepair.
Het as the lightly smilled at the I saw the old half wistful all.
Still lurking in her sea blue eyes;
For I had known her as a child,
And ere she grew so workly wise.
When she was like a flower and fair,
We two had wandered, free and wild,
Down hills that faced the sea.

· A Tragedy.

Down hills that faced the sea.

Oh, she who seemed a flower of old And knew each hill and highland place From April green to autumn gold I saw go through the drifting rain With rouge upon her childish face. To hide a shadow of the pain And all the aring sorrow there! Yet with the same old queenly tread She faded down the darkening square Amid the night she knew too well. And like the statellest flower that grows Sho held her queenly little head.
And still, it seemed, from that poor rose An old sweet perfune fell.
